

Regulatory Alert – Israel

Ongoing delays at Ministry of Communications (MoC)

Further to PCS' Regulatory Alert dated 6th June 2017 concerning the change in working hours of Israeli RF Regulator *Ministry of Communications* (MoC), PCS can confirm that delays to all Type Approval related activities remain ongoing.

PCS have recently been informed that the MoC are operating with reduced staff and, in addition to the reduced opening hours to the public, they still have a huge backlog of Type Approval Applications to process.

As it stands, and also taking into consideration the recent month-long break to celebrate the Jewish New Year, it is likely that delays will continue for the foreseeable future.

PCS will continue to monitor the situation and will keep customers informed when further information is made available.
